

# Using the “Hundreds Charts With Multiples”

Students like to see a visual display of concepts. Hundreds Charts are a great way for students to practice memorizing the ‘times table’. I have included several “Hundreds Charts With Multiples”. Here are suggestions for using them:

**The first several** “Hundreds Charts With Multiples” have the multiples shown as red numbers. You may want to **make a color copy** of each (or 5 copies of each), put them into plastic page holders and keep them in a binder. When you want the students to practice, they are at your fingertips!

## **How will students practice?**

They can use sets of multiplication or division flash cards. Or they can use a simple deck of cards, from which the face cards and jokers have been removed. The student chooses a page, such as “Hundreds Chart With Multiples”, and “With the Multiples of 8”. The student then starts turning a card face up, such as a ‘5’, and quickly says, “ $8 \times 5$  is 40”, turns another card face up, such as a ‘9’, and quickly says, “ $8 \times 9$  is 72”, etc. This works well with groups of students so they can check each other’s answers.

## **Extra ideas....**

Set a timer so the student can see how many problems they accomplished within that allowed time. Then set it again to let the student try to ‘beat their old time’.

Make a bulletin board showing the names of students who have accomplished 20 problems within 3 minutes or within 2 minutes or 1 minute.

Send a certificate or note home with a student once they have accomplished a goal.

**The last “Hundreds Chart With Multiples of \_\_\_\_”** is available so a teacher, tutor or parent can make a copy and choose which multiple they want the student to practice. You may want to make a copy for each student, then choose the number for which they are to find the multiples, such as the multiples of 6. Students could color in the multiples of that number. They will see a pattern! Then students practice the multiples of that given number.

**The final pages** can be the cover for a binder and the title on the binding.
